

The Celtic Manor Hotel

Project overview

A wide ranging electrical contract over a 2 year period at the prestigious 5 star, 400 room, Celtic Manor Resort Hotel in Newport. The systems installed include fire alarms, CCTV security, intruder detection, internal and external lighting, televisions, and data networks; stand by generators and a back up UPS system. Safety systems are paramount and include a voice alarm system (allowing a carefully managed staged evacuation process), smoke extraction systems within the 2 level underground car parks and comprehensive emergency lighting.

Challenges

As one of the finest, internationally renowned Resort Hotels in the UK, only the best quality workmanship, systems and services can be considered. The Celtic Manor Resort incorporates a wide variety of construction types and architectural styles, Whitehead were tasked to ensure that all systems are fully integrated.

Solutions

Our long term relationship with the Celtic Manor and wealth of experience in providing services solutions of exceptional quality has resulted in the development of working processes that meet the needs of this high profile client.
