

Media Wales Headquarters

Project overview

Design and installation of wide ranging Mechanical and Electrical services at the 7 storey, 7500m² Media Wales HQ, located in Cardiff city centre adjacent to the Millennium Stadium. With communications technology at the heart of the media the installation included a complex IT network, television and photographic studios, stage lighting and extensive communication systems including plasma screens throughout the building. Environmental and safety systems included air-handling and air-conditioning, smoke extraction and a 500KVa back up generator, essential to maintain 24hr uninterrupted operation.

Challenges

With the media utilising the highest levels of communications technology and driven by deadlines this project was a major test of both our systems knowledge and project management expertise.

Solutions

Close liaison with the building user, our client and selected specialist partners combined with hands on management were the key. With such a wide range of knowledge and skills employed a detailed project plan and constant communication was essential to a successful completion, on time and on budget.
