Navigation Park

Project overview

An extensive Electrical services installation within a growing office complex at Navigation Park, Abercynon, South Wales. This flagship development includes 30 purpose built offices that are an ideal base for entrepreneurs and established businesses alike. The final of 3 phases undertaken over a 3 year period this project included the installation of category 7 lighting, under floor heating, fire alarms, IT and data networks, CCTV security systems and a sophisticated 24hr tenant access system.

Challenges

A short program and the need for consistency were both important issues for this high profile project. Scheduled to open its doors to a number of tenants within a short space of time, Whitehead had to work against the clock to complete the work on time.

Solutions

Applying the companies 'End2End' process maps the Whitehead team were able to communicate the projects requirements effectively ensuring a high level of quality and consistency. Working in partnership with Keir Weston the Whitehead project team achieved successful completion on time and on budget.
