

Newbridge Gateway

Project overview

Design and installation of Electrical Services into a purpose built 3 storey office building for the Caerphilly Health Trust. Services provided include power and lighting, IT and data networks, CCTV security monitoring, access control and fire alarm systems.

Challenges

As always Whitehead sought to deliver a contract which exceeded the client's expectations whilst remaining within the agreed budget. The projects short program and fixed deadlines made achieving these aims a constant challenge.

Solutions

The Whitehead reputation for providing a wide range of quality services could not be achieved without excellent people and structured management. Our 'End2End' processes were employed to provide excellent communication resulting in successful completion, on time and on budget.

Project title

- » Newbridge Gateway
- Caerphilly Health Trust

Project Manager

- » Steve Jones

Sector

- » Public/Health
