The Priory Grange - Care Hospital

Project overview

Design and installation of Mechanical and Electrical services within the Priory Group's latest purpose built care hospital complex. Services provided include gas supplies, heating and air-conditioning systems, electrical, CCTV, fire alarms, intranet network and a bespoke staff 'name call' system.

Challenges

These included the building's location adjacent to an existing operational care home and its construction comprising solid ceilings with very limited space for services.

Solutions

The Whitehead team created a successful working partnership with all other contractors. The companies 'End2End' processes were used to develop and communicate systems to co-ordinate safety, logistics and installation methods.

Project title

» The Priory Grange - Care Hospital

Project Manager

» Mark Eaves

Sector

» Private/Healthcare

Location

» Bristol

Client name

» BMH Construction

Start date

» March 2005

Completion date

» October 2005

Value

» £550,000

"This was a challenging project but with our experience and expertise the project reached a very successful conclusion. The outstanding quality of work was produced on time, with minimal disruption and without exceeding the budget."
